

October 2021

Dear Valued Customer,

As seen in recent years, PD continues to grow as the therapy of choice among healthcare providers and patients. To proactively meet that growth, Baxter is optimizing our manufacturing and distribution process to allow us to better serve our patients and clinicians.

As part of these efforts, starting in November 2021, patients using **HomeChoice, HomeChoice Pro or Homechoice Claria** Automated PD Cyclers with Automated PD Set with Cassette 4-prong (product code R5C4479C) may receive Automated PD Set with Cassette 4-prong (product code R5C4479) for use with their cyclers. **Product code R5C4479 is medically equivalent to product code R5C4479C** used to deliver and drain solution to and from the peritoneal cavity during treatment and compatible with our HomeChoice family of APD cyclers.

These sets are medically equivalent with only slight packaging variations, see details below:

Code	R5C4479C	R5C4479
Description	Automated PD Set with Cassette 4-prong	Automated PD Set with Cassette 4-prong
Packaging Variation	Patients required to tear packaging from the top	Patients required to peel open packaging
Image		

Please note that no action is required by patients, but some clinics may receive a phone call from Baxter to confirm the cassette's inclusion on patient prescriptions. If you have any questions, please contact Baxter HomeCare Services at 1-800-284-4060.

Thank you for the opportunity to serve you with Baxter's PD products!

Sincerely,

Alexandra Duffy
