

IMPORTANT NEWS FROM BAXTER

A New Tape Supplier Has Been Qualified for Renal Products.

What this means: As of **March 2nd, 2022**, you may notice that the tape on your renal solution carton may be slightly different in transparency. The new supplier's tape, while similar in coloration, is slightly more transparent than the original tape supplier. The renal solution bags inside of your box remain the same. You may receive products with either type of tape.

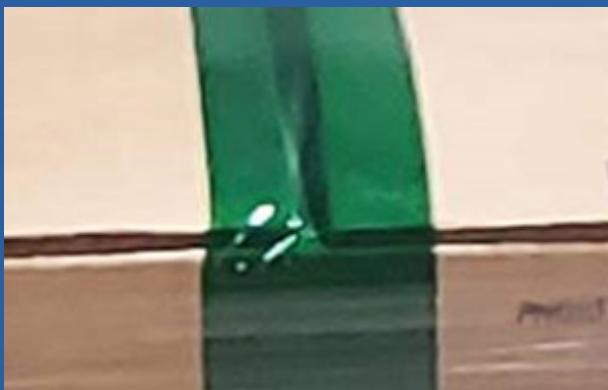

This difference is **cosmetic only** and the function of the tape remains the same.

An additional supplier qualified to ensure that there is sufficient inventory of tape for manufacturing of these products.

This means that Baxter performed quality testing to ensure that the new supplier's tape met all specification requirements required for the product.

The following images highlight the difference between the previous and the current tape used to close your renal solutions boxes.
