

IMPORTANT NEWS FROM BAXTER

Minor change to Automated PD Set with Cassette - 4-prong

Peritoneal dialysis (PD) continues to grow as the therapy of choice among healthcare providers and patients. To proactively meet that growth, Baxter is optimizing the manufacturing and distribution process to allow us to better serve you and your patients.

As part of these efforts, starting in June 2024, patients using **HomeChoice, HomeChoice Pro** or **Homechoice Claria** Automated PD (APD) Cyclers with 4-Prong Cassettes (product code **R5C4479C**) may instead receive 4-Prong Cassettes (product code **R5C4479**) for use with their cyclers. Both APD cassettes are the same except for one slight packaging variation, please see table below for details.

This change may impact patients with 4-prong cassettes on their prescription and we ask that you inform your patients of the upcoming change. A prescription update is not required as part of this change.

The table below provides a feature comparison of **R5C4479C** and **R5C4479**.

The ✓ indicates that the feature is the same. The ✗ highlights the one difference related to packaging.

	R5C4479C - CURRENT	R5C4479 - NEW
Configuration	✓	✓
Patient & Solution Connectors	✓	✓
Pouch Configuration (Packaging)	✗ Peel-off	✗ Flow wrap
Pack Factor	✓	✓
Prescription Update Required?	No, for patients who have 4-Prong Cassettes on their prescription, the product will be automatically substituted.	

If you have any questions, please call **HomeCare Services** at **1-800-284-4060**.

We appreciate your business and continued partnership in patient care.
